

Capability Statement

BULK MATERIAL HANDLING EQUIPMENT DESIGNER & FABRICATOR, BULK FLOW ANALYSIS & SERVICES, 3D MODELLING AND 2D DRAFTING

MCFT is a Australia and Asia based engineering company specializing in providing Mechanical Engineering services for mining, power generation, iron-steel and manufacturing industries.

MCFT has a qualified team with many capable professionals experienced in the design & fabrication of transfer chutes, screens, train/truck load-out system and offering solutions to onsite issues.

MCFT can provide simulation services and engineering analysis to clients employed Discrete Element Method(DEM), Computational Fluid Dynamics(CFD), and Finite Element Analysis(FEA).

MCFT can offer a variety of 3D model design and 2D draft services as well as providing engineering and fabrication drawings.

Our Goal is to operate at the forefront of materials handling technology and provide a high level of engineering services.
